Call : 9833900990 | 9833900330

Our Branches : Dadar | Matunga | Andheri - Mode of Training : Online | Offline | Hybrid

ETHICAL HACKING | 30-HOURS | ₹10000

Our Ethical Hacking and Cyber Security course introduces the basics of hacking and security. Learn how to protect systems and networks from cyber threats through practical, easy-to-understand lessons. Perfect for beginners, this course builds a strong foundation in ethical hacking and digital safety.

PENETRATION TESTING | 60-HOURS | ₹15000

Our Penetration Testing course teaches you how to identify and fix security weaknesses in systems and networks. Through hands-on exercises, you'll learn to simulate cyber attacks and improve defenses. This course is perfect for anyone wanting to enhance their skills in finding and addressing security gaps.

BUG BOUNTY | 60-HOURS | ₹20000

Our Bug Bounty course teaches you how to find and report security bugs in software and websites. You'll learn the skills needed to identify vulnerabilities and earn rewards from companies. This course is great for those interested in making the internet safer while potentially earning money.

PYTHON PROGRAMMING FOR HACKERS | 30-HOURS | ₹5000

Our Python Programming for Hackers course teaches you how to use Python to write scripts for hacking and security tasks. You'll learn to automate processes, analyze data, and create your own hacking tools. Perfect for beginners, this course makes programming easy and practical for cybersecurity enthusiasts.

CYBER CRIME INVESTIGATION | 30-HOURS | ₹25000

Our Cyber Crime Investigation course teaches you how to investigate and solve digital crimes. You'll learn techniques for tracking cybercriminals and gathering digital evidence. This course is ideal for those who want to understand and combat online criminal activities.

SOC ANALYST | 60-HOURS | ₹15000

Our SOC Analyst course trains you to monitor and protect an organization's IT infrastructure. You'll learn to analyze security threats, respond to incidents, and use advanced security tools. This course is perfect for those aiming to become experts in cybersecurity operations.
